We are the plant, not a dealer.

We build frameless cabinetry and closets in our own Houston shop — our machines, our software, since 2007. Almost everyone you compete against is reselling somebody else's box: imported, warehoused, marked up, and three weeks from a replacement door.

SALES PORTAL
yudezign.com/sales

> "We're YuDeZign — we manufacture frameless cabinets and closets right here in Houston, in our own plant. Three-quarter-inch plywood, soft-close standard, twenty standard colours. Because we're the actual factory, there's no importer and no distributor between you and the shop that builds your cabinets — and we can price a whole community, not just one kitchen. **What are you working on?**"

WHO BUYS FROM US — FIVE LIVE LANES

LANE	TYPICAL SIZE	WHAT THEY ACTUALLY CARE ABOUT
Builders & developers where the growth is	$27K–$32K a home	Price per plan, spec consistency, and a supplier who doesn't blow a closing date
Cabinet dealers trade accounts, B2B	recurring	Margin, ease of reorder, pricing sheets they can quote from fast
Designers, remodelers, GCs	$5K–$15K	Speed, responsiveness, not being left holding a problem
Commercial medical, hospitality, townhomes	$14K–$43K	Compliance, phasing, drawings their trades can build from
Homeowners direct	$3K–$10K	Trust. "Come see the plant" closes more of these than any brochure

WHERE WE'RE POINTING

Builders & developers	**70%**
Remodel	**20%**
Custom & luxury	**10%**

A custom homeowner is one kitchen and one relationship. A builder is one relationship and forty kitchens. That is the whole reason for the shift.

TERRITORY

Ninety minutes' drive of the plant — 5802 Colfax St, Houston. Delivery is $350 a trip inside Greater Houston. Outside the radius a job quietly eats its own margin in freight and site visits.

Plant: 5802 Colfax St, Houston — built here, collected here.
Showroom: 13230 Murphy Rd, Ste 600, Stafford — where you take a customer.

ANCHORS WORTH CARRYING IN YOUR HEAD

Single vanity	**~$2,600**	delivered work
One-off kitchen	**~$6,000**	delivered work
Closet package, contractor	**~$22,800**	delivered work
Custom home — 62 cabinets	**$31,880**	delivered work
Largest job we have **quoted** — 54 units, 1,188 cabinets	**~$325,000**	**STILL OPEN. Scale anchor, never a reference**

WE BUILD

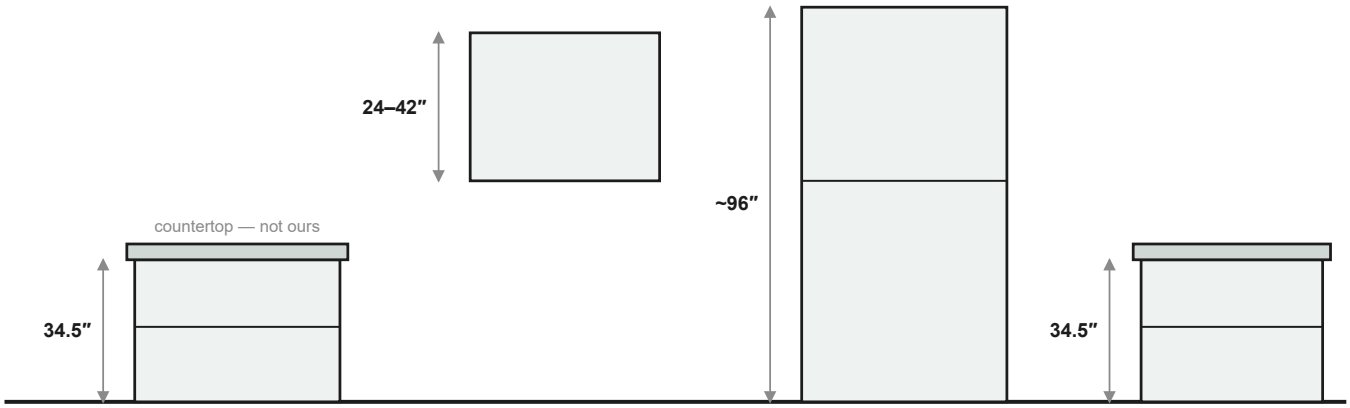

- **Frameless only** — European full-access
- Flat-panel (slab) and shaker doors
- Kitchens, vanities including **ADA**
- Walk-in and reach-in closets
- Mudrooms, credenzas, coffee bars
- Laundry, offices, media walls
- Multi-family and commercial casework

WE DO NOT BUILD

- **Framed** — **we stock it, we don't build it**
- Raised-panel doors
- Inset doors
- **Solid-wood shaker** — ours is machined MDF
- Countertops
- A single box taller than **96″**

Knowing the edge of the catalogue is what lets you sell fast and never eat a change order.

STANDARD DIMENSIONS — LEARN THIS PAGE

KITCHEN BASE
24″ deep
+1.5″ top = 36″ · ADA box 32.5″

WALL
13″ deep
most common 36″ · hung at 54″

TALL
24″ deep
a 4×8 sheet is the limit

BATH BASE
21″ deep
or 32.5″ for ADA

	DEPTH	HEIGHT	WIDTHS
Kitchen base	24″	**34.5″** → 36″ finished	3″ increments, 9″–42″
Base — ADA	24″	**32.5″** → 34″ finished	same
Wall	13″	24 / 30 / **36** / 42″	12 / 15 / 18″ single door · 24 / 30 / 36″ double
Tall	24″	~96″	15 / 18 / 21″ single · 30 / 36″ oven & microwave
Bath base	**21″**	34.5″ or 32.5″ ADA	3″ increments

DOOR STYLES — TWO OF THESE THREE

Raised Panel

Shaker

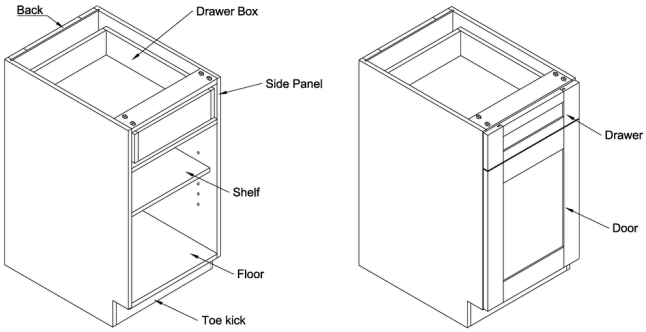

Flat Panel / Slab Door

× **Raised panel**	Multiple parts, moulded profile. A specialty build. **Not ours.**
✓ **Shaker**	Ours — **machined from one piece of MDF**, then RTF or painted
✓ **Flat panel**	Ours, and the most common. Melamine, laminate or acrylic on a PB or MDF core, edge-banded

If a customer points at a raised-panel door, say no early. It is the most common way a cabinet order goes wrong late.

Volunteer the shaker disclosure before they ask. Machined MDF, not solid wood. Said up front it is an engineering advantage — MDF cannot warp or split at a joint. Discovered later it is a credibility problem you don't recover from.

ANATOMY OF THE BOX

Frameless European Style Cabinet

PART	WHAT IT IS
Sides, top, bottom, shelves	**¾″ plywood.** Particleboard on request if a customer needs cost out
Back panel	¼″ plywood
Drawer bottom	¼″ plywood
Joints	Cam-and-dowel — 3-in-1 connectors pull every joint square and keep it there
Hanging	French cleat, which is why wall units land dead level
Drawer box	Rides **soft-close, full-extension, 100 lb** ball-bearing slides
Every exposed edge	1 mm banding, colour-matched — seals the core against moisture and makes the panel read as one piece

No face frame. That is the whole difference: the hinge mounts straight to the side panel, so the opening is as wide as the box.

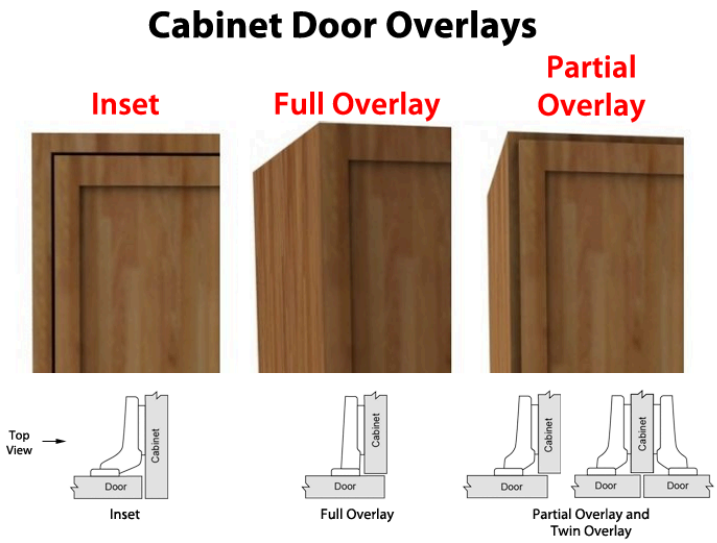

THE THREE BOARDS

BOARD	WHERE IT BELONGS
Plywood	The cabinet box. Strong, holds a screw, survives a wet sink base
Particleboard	Door cores — or the whole box, if a customer needs cost out
MDF	Door cores, especially **shaker**: it machines cleanly and takes paint raw

THE FIVE FINISHES

FINISH	WHAT IT IS
Melamine	One resin-soaked paper fused to the core. Thin, needs specialist machinery
Laminate	Many resin layers bonded to a substrate. Thicker, tougher
Acrylic	Glossy, near-mirror, UV stable
Paint	Fully custom colour, needs care
RTF	Vinyl film vacuum-pressed over MDF — how our shaker gets its finish

OVERLAY — THE THING DESIGNERS ASK ABOUT

The overlay is how the door sits in front of the box. It is set by the hinge and its base plate — which is why a designer who specifies an overlay is really specifying hardware.

Inset	Door sits *inside* the opening. **We don't make this.**
Full overlay	Door covers the panel completely. **Kitchens and vanities** — ours
Half overlay	Two doors share one panel. **Closets** — ours. The diagram calls this *partial*; same thing

Frameless plus full overlay is what produces the wider openings and the uninterrupted line across a run — the two things worth saying out loud when somebody asks why frameless.

Same box. Same motion. Different skin.

The single most useful sentence you own: **the carcass and the hardware are identical across all four Styles** — same frameless ¾″ plywood box, same DTC soft-close hinge, same slide for a given box depth. What changes is the door surface and the finish family. That is how you move a customer up or down without them feeling downgraded.

STYLE	WHERE IT FITS	DOORS	HINGES	SLIDES
Essential value	Rentals, spec homes, hardworking family spaces	Woodgrain & solid TFL	DTC	by box depth
Signature mid	Warm kitchens, dens, lived-in spaces	European TFL, deep textures	DTC	by box depth
Reserve mid-high	Modern builds where the architecture speaks	Super-matte, soft-touch, high gloss	DTC	by box depth
Atelier high	Flagship kitchens, media walls, hospitality	Lacquered high gloss & perfect matt	DTC	by box depth

The hardware column does not ladder — say so out loud. The slide is set by box depth, never by Style: a DTC concealed undermount on 21″ and 24″ boxes, the KV 8450FM on the rest. There is no hardware upgrade to sell. The hinge is **six-way adjustable**, so an installer trues a door up on the wall without pulling it off the box.

CLOSETS — THE SAME LADDER

Everyday	Open adjustable system, white & grey linen. “An organised start”
Wardrobe	Five-colour closet palette, flat panel or RTF shaker, accessory bundles
Dressing Room	Glass fronts, any cabinet finish, integrated LED standard

Same plant and same hardware as the kitchens, but **a different board**: the closet system is mostly particleboard-cored panel, some MDF. Plywood is a custom lay-up — more money, more lead time. The margin is in the organisers, not the box.

FINISHES

Say **“twenty standard colours, five per Style.”** The full library is there on request.

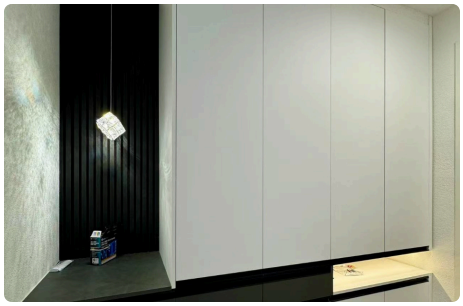

The internal library is far deeper. When someone asks for a specific colour, the answer is **“let me check the library and come back to you”** — correct, fast, and it gives you a reason to call.

Hardware finishes	Brushed nickel · polished chrome · matte black
Opening	Handles · **J-pull** · gola · push-to-open
Partners	Häfele · Würth · DTC · Knape & Vogt

WHAT THAT LOOKS LIKE

Kitchen · Weathered Bark

Floating mudroom · J-pull, soft-touch matte

Coffee bar · lit uppers

Every photograph on this page is our own work, delivered. Show these on your phone. A builder believes a photograph of a finished run faster than any sentence about our capability — and these are the only images you should ever present as ours.

Showroom kitchen

Feature wall & credenza

Mudroom & bench

Makeup vanity

Walk-in closet

Reach-in closet

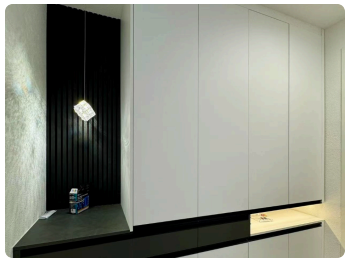

Dining & media wall

Multi-family units

Hotel reception

Floating mudroom · J-pull

Coffee bar

Kitchen · lit island

MATCH THE PHOTO TO THE BUYER

Builder / developer	Multi-family units, showroom kitchen — repeatable, consistent, one spec across every plan
Designer	Feature wall, floating mudroom, makeup vanity — the ones that photograph well
Remodeler / GC	Mudroom, coffee bar, reach-in closet — the jobs they actually get asked for
Commercial	Hotel reception, multi-family — casework, phasing, volume

You are never penalised for saying "let me confirm that and come back to you today." You are penalised for guessing. Our own documents contradict each other on every number below — seven lead times, five deposit figures, three warranty lengths. That is not your problem to solve. Say the line in the middle column and nothing else.

NEVER SAY → SAY INSTEAD

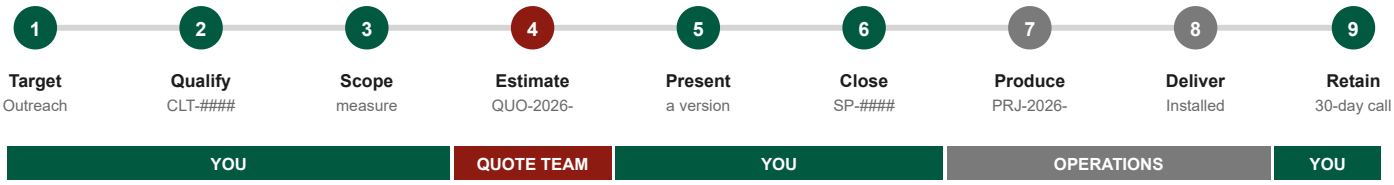

NEVER	SAY
Any production time in days or weeks	"In as little as two weeks, depending on finish and scale. **Your quote carries the committed date** — I won't guess at it."
Any deposit percentage	"Terms are set in your written agreement, and I'll walk you through them before you sign anything."
Any warranty length	"Your written warranty comes with your agreement — let me send you the current sheet."
"We install"	"**Install support.** Every panel is QR-tagged to our app. Installation goes through our partner contractors inside Greater Houston, quoted separately."
Any tier, discount or multiplier	"Trade pricing is set per account — let me get an account opened and come back with your numbers."
What anything costs us	Don't answer. "Let me show you where the money actually goes in a cabinet."
"19 mm"	"**Three-quarter-inch** plywood." Inches, out loud, every time.
A 24-hour quote turnaround	"I'll give you a date when I take your dimensions."
A job we quoted but didn't win, as a reference	Name **delivered** work only. For scale: "we quote multi-family packages up to fifty-plus units."
Any competitor claim	"**What do you like about working with them?**" — then write it down.
A price from memory	Present the quote by its version number. Nothing else.

WHO ACTUALLY DECIDES WHAT

Nobody expects you to hold these answers. What matters is knowing **where each one lives**, so you route it in one move instead of guessing.

QUESTION	WHERE THE ANSWER COMES FROM	HOW YOU ROUTE IT
Product, construction, dimensions	The spec of record — pages 2–4	**You answer it**
Price on a job	The quote team, as a versioned quote	Submit a Discovery Sheet
Discounts, trade pricing	Management — reps have no discount authority	Through the office, same day
Deposit, terms, warranty	The signed agreement — being confirmed	Deflect, then flag it
Dates on a large job	Operations — they hold the plant schedule	**Ask before you say a date**
Claims, damage, missing parts	orders@yudezign.com	Email same day, copy the office

NINE STAGES, FOUR HANDOFFS

Stage 4 is a black box: you submit a complete packet and receive a priced, versioned quote. Stage 9 is yours — that is where the second order comes from.

THE FOUR HANDOFFS

H1	You → quote team. **A completed Discovery Sheet *is* the packet.** Incomplete comes back, and bounces are measured
H2	Quote team → you. You present **that version** — never a number from memory, never one you adjusted in the truck
H3	You → operations at *Sold*. Four conditions: approved in writing, signed, terms met, **no open client decisions**
H4	Operations keeps logistics. **You own the 30-day call** — ops has no reason to ask for the next job

YOUR CONTRACT WITH THE QUOTE DESK

- Submit a **complete packet**
- Receive a **versioned** quote — QUO-2026-####
- Present **that version**
- Never show what anything costs us

MONEY & LOGISTICS

Assembly	$30 base or wall · $60 tall
Delivery	$350 per trip, Greater Houston
Measure & design	$250 + 2 designs · $100 client-measured · **credited**

YOU CANNOT LEAVE A STAGE UNTIL…

STAGE	THE EXIT GATE	WHAT GOES WRONG WITHOUT IT
1 Target	Contact attempted **and logged**	The other rep dials the same company on Thursday
2 Qualify	Fit, need, timeline and zip on a Discovery Sheet — record created **in the car**	Records made that evening are records made wrong, and the 24-hour clock has already started
3 Scope	Complete dimension and photo package in the project folder — appliances and sink **measured, not guessed**	A run designed around a guessed fridge gets remade at our cost
4 Estimate	A priced, versioned quote is back with you	—
5 Present	Client accepts **a named version number**	“They’re happy with it” is not an exit condition, and you will be held to whichever version they remember
6 Close	Signed, terms met, **no open client decisions**	“They’ll confirm the handle later” is a change order you haven’t written yet
9 Retain	30-day call made, next opportunity logged	A builder who buys once is a transaction. Twice is the strategy

Before you say a delivery date on anything over 250 cabinets, get a plant load check. Before the sentence, not after the quote. The plant runs about 500 cabinets a month — a 54-unit job is one and a half to two months of the entire factory. Selling more than we can build costs us the relationship *and* the next three.

THE SIX YOU WILL HEAR THIS WEEK

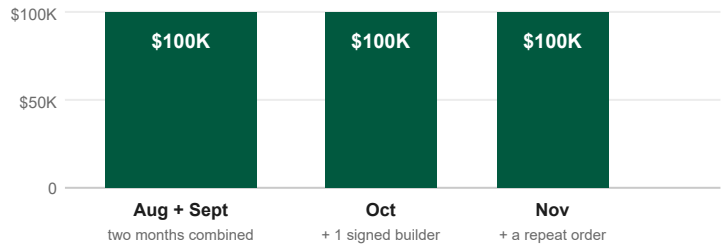

THEY SAY	YOU SAY
“You’re more expensive.”	“Send me what you’re comparing to and let’s line them up — box material, drawer count, slide rating, whether soft-close is standard or an upcharge. Half the time the gap isn’t price, it’s specification.”
“How fast can you get these?” never-say bait	“In as little as two weeks depending on finish and scale. Your quote carries the committed date — I’d rather give you one I can hold. What’s driving your date?”
“I want solid wood shaker.”	“Then I should be straight with you — ours are machined from MDF. That’s deliberate: it won’t warp or split at the joint. If solid wood is a hard requirement, I’m not your shop and I’d rather tell you now.”
“My designer specified face-frame.”	“We can do that — and I’ll be straight about how. Our plant runs frameless, so the framed is a **stocked line we carry**, not one we machine. If it’s the traditional *look* she’s after, our shaker in frameless gets you there and it’s our own build.”
“I’ve been burned before.”	“Tell me what happened.” **Then stop talking.** Whatever they say is your entire strategy for this account, handed to you free.
“I already have a cabinet guy.”	“Good — you should. What do you like about working with them?” **Write it down.** Then: “I’m not asking you to switch. Put me on the next one you’re pricing.”

BALLPARK, PER LINEAR FOOT — Kitchen & garage $215 / $375 · Home office $190 / $340 · **Closet** $165 / $315 · **Bathroom** $130 / $225 — per linear foot, semi-custom / custom. **Supply only · assembled · delivery and install extra · finish moves it · spoken only, never written.**

THE THREE ARGUMENTS

vs an import	“No ocean freight, no port delays, no distributor between you and the shop that builds your cabinets. And your replacement door in month eight comes from the same building.”
vs a big box	“That’s a boxed-in showroom set. We’re made to measure — custom widths, custom modifications, twenty standard colours and a deeper library.”
vs a local shop	“A trade partner, not just a supplier. One source for cabinets, closets and casework, consistent across every plan you run.”

WHAT WE’RE AIMING AT

August is a training-and-show month. Realistically most of the Aug+Sept figure lands in September. A light August is not failure.

$100K against the plant

Your $100K a month

300–405 cabinets | 500 cap

= 60–80% of the entire plant

And the plant still has to feed our existing accounts and commercial work that has nothing to do with you.

Weekly, per rep

Dials	**125**
In-person touches	**8**
New accounts	**2**
24-hour follow-up	**95%**
Estimates out	**3**
